MACHINE REFURBISHMENT & CONTROL SERVICES

Give your aging equipment a new lease on life. We specialize in transforming outdated machines into efficient, reliable systems with cutting-edge automation and intelligent control solutions.

WHY CHOOSE US?

- Proven expertise in industrial automation.
- Custom-designed control panels tailored to your operations.
- Extensive experience with servo retrofits and safety integrations.
- Quick turnaround with reliable onsite support.
- Proudly Canadian engineering and technical services.

ADVANCED CONTROL SYSTEM RETROFITS

Modernize your equipment with new PLCs, HMIs, servo drives, or industrial PC-based control systems for better functionality and flexibility.

COMPLETE MACHINE REFURBISHMENT

We restore and upgrade mechanical and electrical components to enhance performance, reliability, and extend your machine's service life.

SEAMLESS CONNECTIVITY

Enable real-time monitoring and remote access with advanced communication protocols such as EtherCAT, OPC-UA, and MQTT.

SMART AUTOMATION INTEGRATION

Incorporate intelligent sensors, AI-powered vision systems, and feedback loops to streamline processes and optimize performance.
